Cataract and Refractive Lens Exchange Questionnaire

The term "cataract" refers to a cloudy lens within the eye. When a cataract is removed, an artificial lens is placed inside the eye to take the place of the human lens that has become the cataract. Occasionally, clear lenses that have not yet developed cataracts are also removed to reduce or eliminate the need for glasses or contacts. This questionnaire will assist us in providing the treatment best suited for your visual needs if it is determined that surgery is appropriate for you. It is important that you understand that many patients still need to wear glasses for some activities after surgery. Please fill this form out completely and give it to the doctor. If you have questions, please let us know and we will assist you with this form.
